MathType High School License

The MathType School License is an affordable MathType licensing program that eliminates the hassle of complicated software administration.
Pricing is determined by the combined number of full and part-time math teachers employed at the school; however MathType may be used on computers within the control of all faculty, staff, and students of the participating school. Schools with less than 5 math teachers must pay for 5.
MathType School licenses are available to primary, middle, secondary and high schools.

Summary

Easy software administration	A single MathType product key, for each platform (Windows, Mac), is issued to the school.
No restrictions on the number of schools **No restrictions on the number of computers** **No restrictions on concurrent use**	A MathType School License allows MathType to be used on all computers within the control of faculty, staff and students of a participating school or school district. MathType can be installed on all: ▪ School computers and networks ▪ Home computers ▪ Portable computers
For both Windows and Macintosh platforms	A MathType School License eliminates the buying decision between Windows and Macintosh software by providing MathType for both platforms at no additional cost.
Pricing options to fit any budget	An Annual Subscription License includes free upgrades, and MathType can be used as long as the subscription payment is current. The number of math teachers at each school will be recounted every year.
