

What is New with Mathcad 15.0?

Mathcad 15.0 Now Available

Mathcad 15.0

This release is geared towards helping customers solve their most pressing engineering calculation needs and improve the documentation of calculations throughout the product development process.

Design of Experiments (DoE)

Design of Experiments (DoE) provides over 25 new functions to reduce the time and expense of conducting experiments thru DoE by understanding the variable interactions that will influence the experiment. DoE helps you identify critical factors and optimal settings for your complex process. It provides templates for a fewer number yet more intelligent experiments which are indispensable when you have multiple variables and levels.

Knovel Math Content

Quickly access the full list of Knovel's fully documented Mathcad worksheets from trusted Roark's and Hick's reference works, reducing the time it takes to solve your complex math problems.

TrueNumbers Integration

Truenumbers enables the ability to easily communicate values across applications and the organization without loss of quantity or unit integrity. Results and values can be moved outside of Mathcad onto different document types – enabling easy sharing of the data.

Excel 2007 support

Leverage the following functions and features with Excel 2007: READEXCEL(), WRITEEXCEL(), READFILE, the data import wizard, and the Excel Add-in

Windows 7 Support

Support for Microsoft Windows 7 platform
