EViews 11... It's About Time

Econometrics & Statistics

Estimation

- Improved Bayesian VARs.
- Mixed frequency VARs.
- Switching VARs (Markov and simple).
- Elastic net and LASSO machine learning.
- Functional coefficient and localized regression.
- Additional cluster robust standard errors.

Testing & Diagnostics

- Seasonal unit root tests.

Graphs, Tables & Spools

- Geographic maps.
- Fan charts.

Interface

- Interactive command explorer to view all the applicable commands for an object and its documentation.
- Name and command auto-complete.
- Value-based spreadsheet and Geomap coloring.

Data Handling

- Integration with Python.
- Duplicates analysis.
- Split-observations high-to-low frequency conversion method.
- Interface to the following data sources:
 - » Bureau of Economic Analysis (BEA).
 - » US Census.
 - » National Oceanic and Atmospheric Administration.
