## Data importing

All data is subject to automatic validation checks prior to import, ensuring you can use your data with confidence. Main categories of data are:

### Laboratories

Laboratory Data can be directly imported into ESdat. Most major laboratories can provide data in a suitable format, which includes comprehensive Quality Assurance information.

### Field

Field and Borehole/Drilling data can be entered directly into ESdat Excel based Import Templates, or imported directly from the PLog PDA system.

### Historical/Other

Historical or data from other sources can be imported directly from tabular formats in Excel.

### Extensible

All hydrogeological, geo-environmental, and similar data can be managed within the system, or it can be extended by the user to capture additional data as required.

Easy import of validated (correct) data is critical to the efficient and reliable usage of the system. Data can be added directly onto a map; to a table; through a PDA; in bulk from Excel; or from data files.

## Chemistry tables

Chemistry output tables automatically show results alongside environmental standards, exceedances and summary statistics.

Results can be grouped or arranged in a specific order; can be orientated with the compounds across the top, or down the left; and exceedances of environmental standards can be indicated by font changes or highlighting.

## Chemistry Quality Assurance (QA) tables

Chemistry data is often assessed against strict QA protocols. The ESdat QA checker has the ability to assess chemistry data for the following QA tests:

- Field and Interlaboratory duplicates
- Field and laboratory blanks
- Holding times
- Certified reference materials
- Laboratory duplicates
- Matrix and trip spikes
- Laboratory control samples
- Surrogates

Complete report with hyperlinks

Overview	Summary
	<a href="#">Summary By SDG</a>
	<a href="#">Summary By Compound</a>
Holding Times	Holding Time Errors (0)
Blanks	<a href="#">Field Blanks</a>
	Detects in Lab Blanks (0)
	SDG's without Method Blanks (0)
Duplicates	<a href="#">Field and Interlab Dupes</a>
	Lab Duplicates with high RPDs (0)
	Duplicate Samples with incorrect or missing Parent Samples (0)
	Samples at the same Location/Depth/Time not specified as duplicates (0)
Surrogates	Surrogate Variation > 25% (0)
Lab Control Samples	SDG's without a Laboratory Control Sample (0)
	Laboratory Control Samples, Error > 25% (0)
Certified and Standard Reference Materials	Certified Reference Materials - Error > 25% (0)
Matrix Spikes	SDG's without a Matrix Spike (0)
	Trip Spikes with invalid Control Sample (0)
	<a href="#">Less than 1 matrix spike in 20 samples, or less than 1 matrix duplicate in</a>
	Matrix Spike Recoveries less than 30% or greater than 150% (0)
	Trip Spike Recoveries less than 30% or greater than 150% (0)
Inorganic	BOD > COD (0)
	Na + CL > TDS (0)
	BOD > COD (0)
Other	Unit Conversion Problems (0)

Detailed tables (ie duplicates)

Summary tables

# ESdat

Your Data. Organised, Analysed, Reported. **Faster**

## Graphing

Graphs can be produced and exported to Excel with a number of options.

Graphs can include a Mann Kendall or Linear Regression trend analysis, and Environmental standards can be included on the graph.

- Lab, field or logger data
- Include environmental guidelines
- Trend analysis

# ESdat

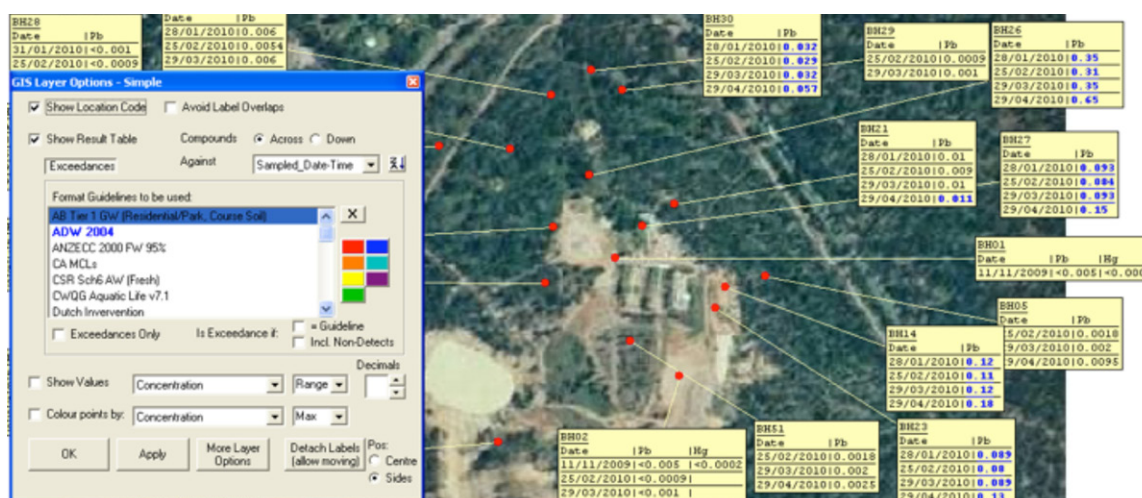

Your Data. Organised, Analysed, Reported. **Faster**

## GIS outputs

An inbuilt GIS offers all the basic functionality required for producing report quality maps.

Data can alternatively be exported to ArcMap, Mapinfo, Surfer or Google Earth using ESRI Shape, MapInfo MIF, ML, text files, or live ODBC database linkages.

- Min / Max / Avg / Range: labels and colouring
- Chemistry tables on an inbuilt map
- GIS is inbuilt, or export to ArcView, MapInfo, Google Earth, Surfer

# ESdat

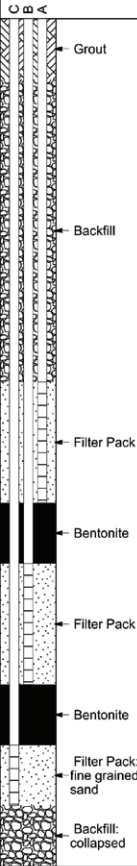

Your Data. Organised, Analysed, Reported. **Faster**

## External applications

ESdat can integrate with:

- Excel
- ProUCL
- Google Earth
- Surfer
- ArcMap
- MapInfo
- EVS
- gINT
- WinLog
- PLog

*"Its simple, efficient and easy to learn"*

**Hamish Campbell, ERM**

*"Ease of use, generic/flexible, standard platforms (Access/SQL Server), support"*

**Luke Cameron, Golder Associates**

*"Quick and easy tables and dataset overview, great QA help"*

**Yvonne Binai, GHD**

*"Ability to pick up guideline exceedences automatically"*

**Belle Casement, Senversa**

*"Good for large volumes of laboratory results"*

**Tom Madill, Tonkin & Taylor**

*"Time savings, especially for long-running sites (historical data). Reduction of errors (no transcription)"*

**Amy Smith, Parsons Brinckerhoff**

*"I like that I don't have to go through the data to find Guidelines exceedances"*

**Ryan Baxter, EBA Engineering**

*"Laboratory reporting formats/QA/QC/TIME SAVING"*

**Cameron Kay, Golder Associates Pty Ltd**

*"Generate chem data and borelogs within minutes. Provides a data base of all lab reports for each job"*

**James Coley, FMG Engineering**

*"Accuracy of data"*

**Tho Tran, OTEK**
