

## System Requirements – Design-Expert® version 25.0:

### Windows

Minimum hardware and operating system requirements:

| Component        | Minimum                      |
|------------------|------------------------------|
| Processor        | 1 GHz                        |
| Hard Drive       | 250 MB free space            |
| Memory           | 2 GB                         |
| Display          | 1024x768                     |
| Operating System | Windows 8.1<br>Windows 10/11 |

Note that Design-Expert is incompatible with Windows XP. Please consider upgrading to one of the operating systems listed above.

### Mac

Minimum hardware and operating system requirements:

| Component        | Minimum               |
|------------------|-----------------------|
| Processor        | 1 GHz                 |
| Hard Drive       | 250 MB free space     |
| Memory           | 2 GB                  |
| Display          | 1024x768              |
| Operating System | macOS 10.15 or higher |

### Network

Network installations involve two components, an installation of Design-Expert, running on the client (see Windows or Mac requirements above), and a license server running on the server to fulfill license requests from the clients (see requirements below):

| Component        | Minimum                                                  |
|------------------|----------------------------------------------------------|
| Hard Drive       | 100 MB free space                                        |
| Operating System | Windows Server 2008 or newer<br>Linux x86 (64 or 32-bit) |
